

ebmpapst

Adsec are pleased to welcome Ebm Papst to our list of satisfied clients, we hold a security contract with this prestigious client who make specialist fans for commercial applications.

As with other TUPE transfers we've inherited some staff from the large contractor who preceded us and have set about getting back to basics by increasing the amount of training in Customer Care, Health and Safety, Manual Handling and Project Griffin (counter-terrorism) for the guards on site. Our client is very pleased with the hands-on approach we've taken to their security needs.

Supplying to the OEM market, ebm-papst UK is a subsidiary of Europe's largest motor and fan manufacturer. From small, compact electronics cooling fans to energy efficient light industrial applications, ebm-papst is the market leader in high quality, technologically advanced air movement products. Ebm-papst UK's team of application, project and design engineers, supported by the massive Research and Development facilities of their parent company, can advise you on the most effective use of their products and the logistic support team will make sure that you get them when you need them and not before. Ad-sec will benefit the company by ensuring their time can be invested solely in their business without concern for the security of their products and buildings.
